

Report on Mask Making Project (Fall 2022)

THEME: GENDER INEQUALITY IN SCIENCE

**TITLE: Phenomenon of unequal
Group: 15**

Course Title: Mass Communication

Submitted by:

Y easir arafat (213012001)

Walter Angkon rozario (213012029)

Submitted to:

Mahmudun Nabi, Course Instructor

MASK Report based on:

GENDER INEQUALITY IN SCIENCE

Phenomenon of unequal

(What do you understand by face negotiation Theory)

The theory attempts to explain reasons behind the different ways people from different cultures handle conflict. The concept of face is important to be aware of in negotiations, as it can cause people to react in different ways in attempts to “save face” when they feel things aren't going their way. This could come in the form of retaliation, conflict, or insulting the other person involved.

(How will you do if you do it again?)

Now I will do better because now I'm experienced ,I learn how to do this I find out my mistakes and I learn better so I will do better if I do it again.

What is the theme of your mask (CI theme)?

Our CI theme is Gender inequality in career science.

(How is this theme relevant to your personal/social life?)

Men and women have equal rights in society irrespective of any sector.because men and women nowadays work almost same ,their work time also same then why inequality for women?

What is your message? Why have you picked this message?

My message is that women are disadvantaged in career terms at work. That cannot be allowed to happen. I have picked this message because women are being disadvantaged in the work sector and men. There are many women who want to become pilots, Astronaut but they are being disadvantaged because of male power.

What images did you want to draw on the mask?

I made one side of my mask black and the other side blue. The side which is colored black is one of the girl's structure with white color and the other side which is blue I painted a male structure on it.

(Role of individual members)

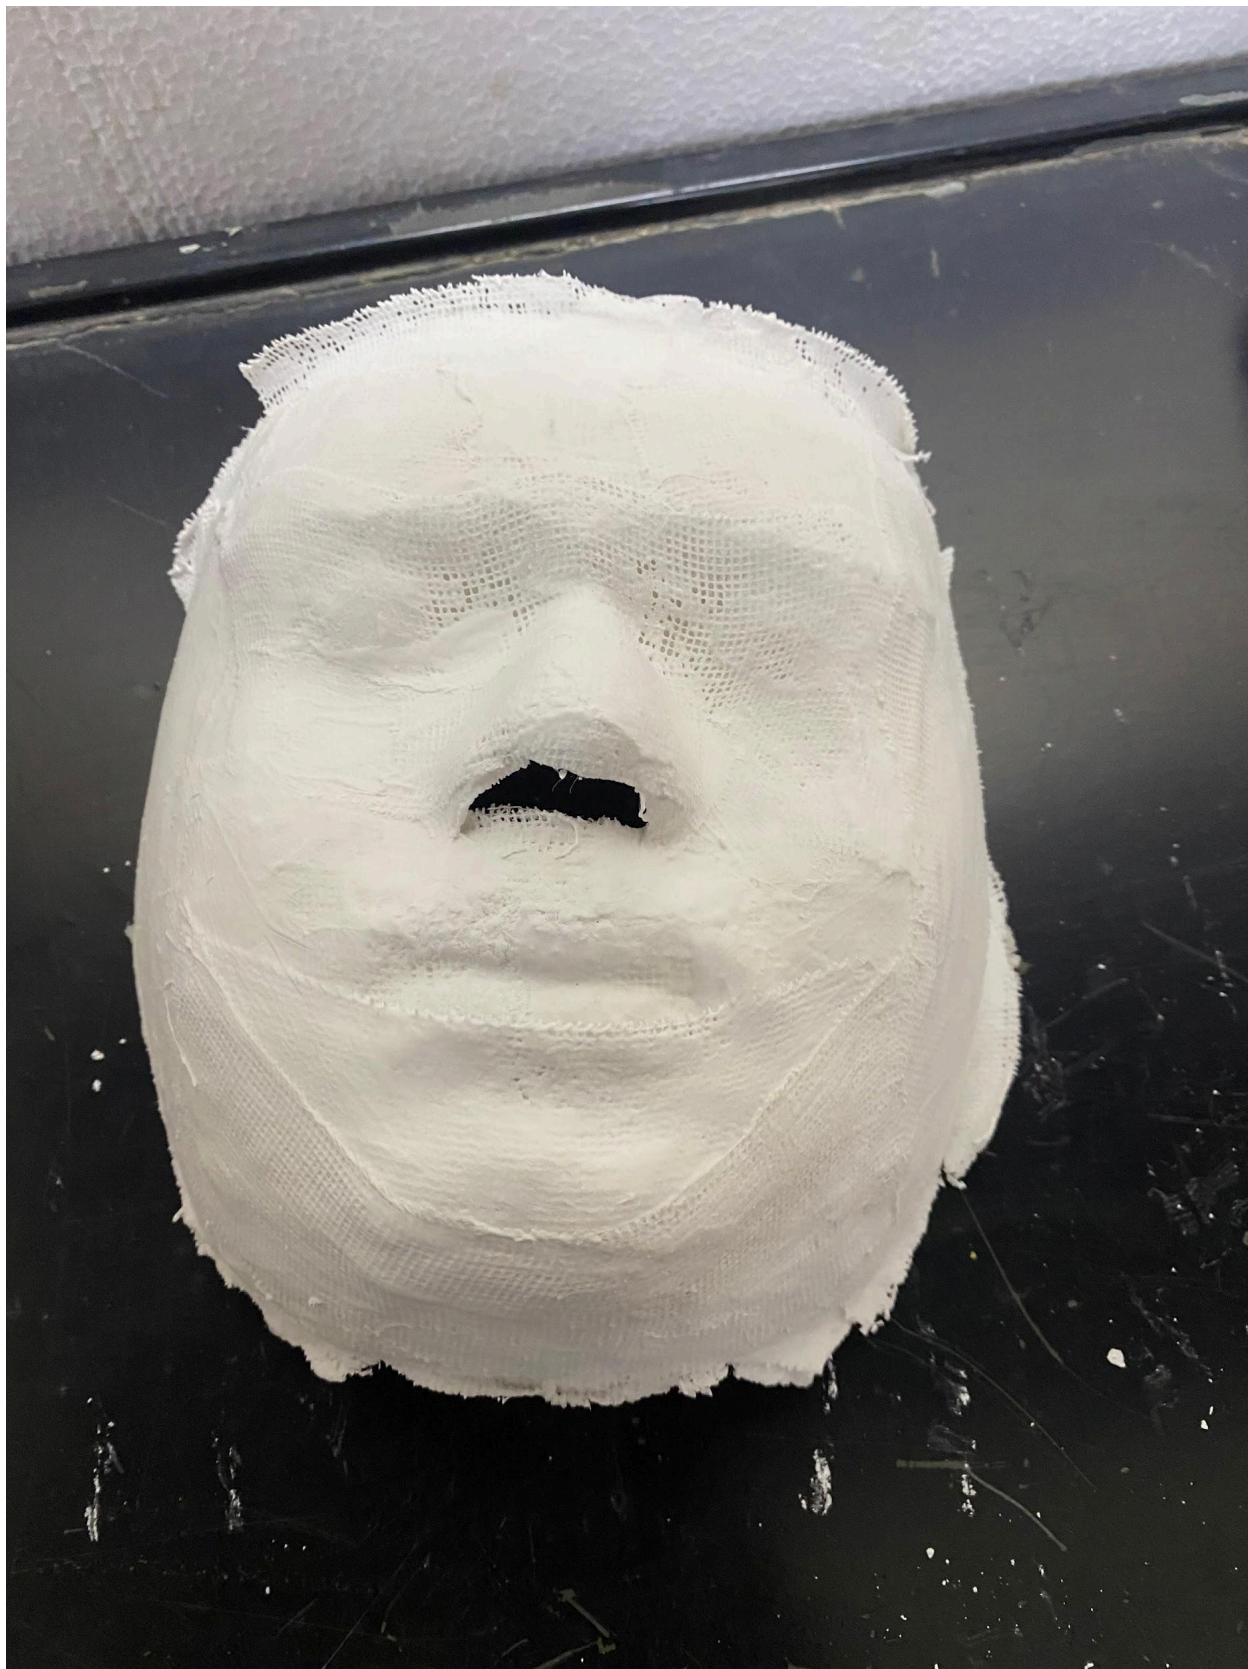

In this project, me and my friend Walter were our group. Both of us had immense roles in the group of two of us. We share our work. For example: On the first day, Arafat sat with his face, I, Walter, applied Vaseline to his face. After that, as instructed by our TA, we soaked Plaster of Paris in water and applied it on Arafat's face, although Arafat felt very embarrassed. However, we have to complete the project. I finished the first day's work very perfectly by putting all the plasters one by one. On the 2nd day, I continued to work on the nose. When that work was completed, this time Arafat was released.

Now we are thinking about opening the main layer of the mask on the one hand and on the other hand we are consulting about the color.

Arafat explained the color and the size of the fabric and I did a lot of research and discussion together to come up with the design. The next day, Arafat brought 5 colored bongs from his home in Mirpur. We brought red, blue, green, black, and white colors as we would use them in the mask, the next day we used white, red, blue, and black colors. It didn't help us that much. Alhamdulillah we can finish the work well.

(Some of our mask making times mask pictures)

(How did you paint your mask)?

On the first day we did the first color layout on the mask. First side was done black and the other side was blue. Then next day I used oiled brush and carefully painted my art on both side.
Did you face any problem while you were painting?

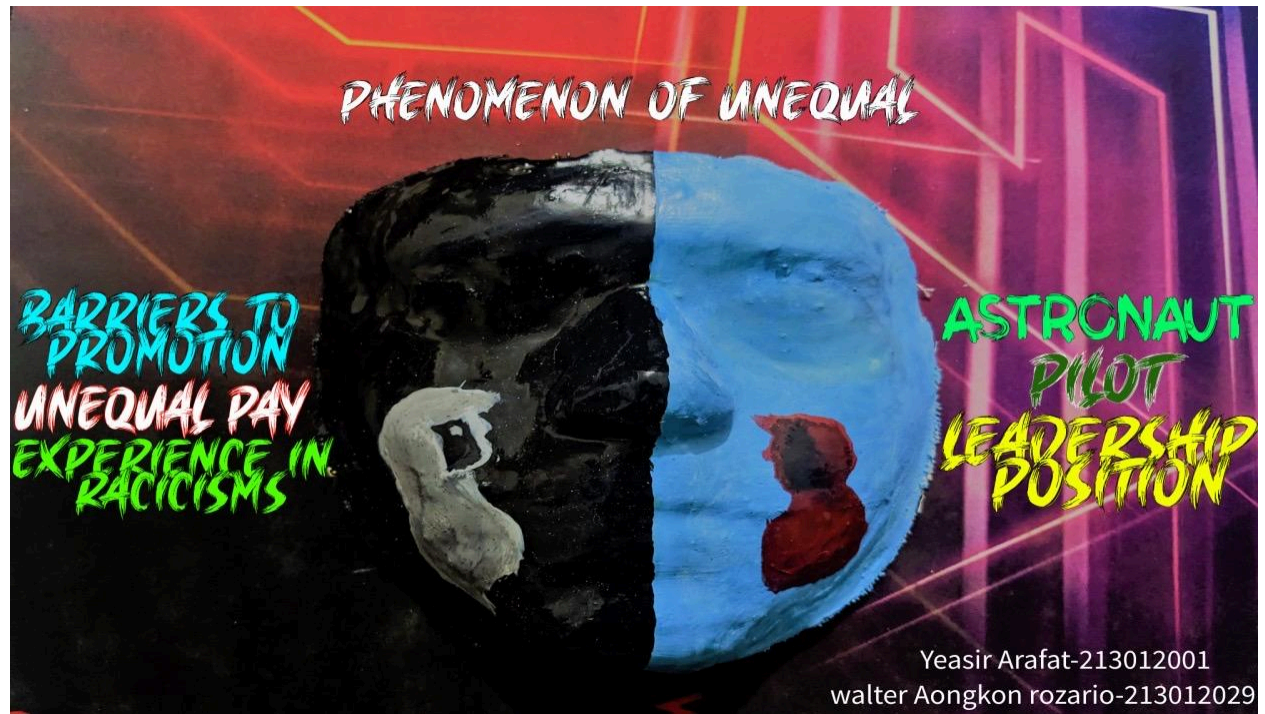

*Yes I faced a problem when I was using the oil paint. It was very oily that I could get one design properly. I had to wait again and again for the paint to dry.
I realized that this was my first time making a mask since I'm not a professional at it so I think I will finish the mask better next time.*

(We both have a fault)

:The fault is we don't give one another proper time to do this better I think.next time we will be more sincere about this.

(Conclusion):

This journey was a new phase of life with many learning's. It really improved once again how important the mind and opinion of two people are in any work. From the graphics to the finishing of Photoshop the mind blowing work Walter has shown is truly commendable. And I have done color work by hand before in my education but I have to say the work needs to be better and hope to be better in the future.
